

Good morning, Gentle folk...

I would, in the strongest terms, request that you do not dilute the efforts of the various Do Not Call registries available to the residents of these United States. I firmly support the concept of people being able to conduct business, but it MUST BE ONLY WITH MY CONSENT. This should not only be limited to companies with whom I have actually done business in the recent past, but it must also be prohibited unless I give my actual "opt-in" permission to be contacted by the merchant or marketing service. This should include not only marketing via telephone, but also email solicitations. Indeed, I sincerely hope that you are protecting the email addresses of those of us who submit these comments to you. As this is a public comment, I pray that you are keeping the email addresses of those of us who comment safe from the Unsolicited E-mailers (spammers). Thank you.
